Weed Dragon® Propane Torch Kit & Cylinder Dolly Receive Seal of Approval from National Gardening Organization

Flame Engineering, Inc. is pleased to announce that the Weed Dragon® Propane Torch Kit and CD-100 Cylinder Dolly have received the National Home Gardening Club, Member Tested Seal of Approval. Club members evaluated the products on a number of test criteria including ease of use, clarity of instructions, design, performance, durability and value.

The Weed Dragon® Propane Torch Kit is designed to offer users a safe, natural way to remove unwanted vegetation around the home and garden. Flaming is fast becoming a popular way to reduce or eliminate herbicide use where children and pets could be exposed without the pain involved with pulling weeds. A split second of heat from the torch is all it takes to kill weeds. It is recommended for rock gardens, sidewalks, driveways, sandboxes, along chain-link fencing, between garden rows and more. The Weed Dragon® may also be used for melting ice and snow, thawing outdoor metal pipes, starting charcoal, heating metal and many other uses. The Weed Dragon® is fully assembled and quickly attaches to any refillable propane cylinder.

The CD-100 Cylinder Dolly is designed to easily transport the propane cylinder and includes a torch bracket to safely hold the torch when not in use.
